EYFS Framework

Personal, Social and Emotional Development

ELG: Speaking

Offer explanations for why things might happen, making use of recently introduced vocabulary from stories, non-fiction, rhymes and poems when appropriate.

ELG: Managing Self

Manage their own basic hygiene and personal needs, including dressing, going to the toilet and understanding the importance of healthy food choices.

Understanding the World ELG: People, Culture and Communities

Describe the immediate environment using knowledge from observation, discussion, stories, non-fiction texts and maps

ELG: The Natural World

Explore the natural world around them, making observations and drawing pictures of animals and plants

Know some similarities and differences between the natural world around them and contrasting environments, drawing on their experiences and what has been read in class.

Understand some important processes and changes in the natural world around them, including the seasons and changing states of matter

KS1 National Curriculum Strands KS1 Working Scientifically Year 1 Biology Chemistry Physics Animals, including Humans Asking simple questions and recognising that they can be answered in different ways Plants Everyday materials Seasonal Change Observing closely, using simple equipment Year 2 Performing simple tests Chemistry Biology Identifying and classifying All living Using their observations and ideas to suggest answers to questions Animals, things and Gathering and recording data to help in answering questions. including Plants Everyday materials their Humans habitats

Lower KS2 Working Scientifically			Year 3		
 asking relevant questions and using different types of scientific enquiries to answer them 	Biol	ogy	Chemistry		Physics
 Setting up simple practical enquiries, comparative and fair tests Making systematic and careful observations and, where appropriate, taking accurate 	Animals, including Humans	Plants	Rocks	Forces	Light
measurements using standard units, using a range of equipment, including thermometers and data			Year 4		
loggers	Biol	ogy	Chemistry		Physics
 Gathering, recording, classifying and presenting data in a variety of ways to help in answering questions Recording findings using simple scientific language, drawings, labelled diagrams, keys, bar charts, and tables Reporting on findings from enquiries, including oral and written explanations, displays or presentations of results and conclusions Using results to draw simple conclusions, make predictions for new values, suggest improvements and raise further questions Identifying differences, similarities or changes related to simple scientific ideas and processes Using straightforward scientific evidence to answer questions or to support their findings. 	Animals, including Humans	All Living things and their habitats	States of Matter	Electricity	Sound

	Upper KS2 National Curriculum Strands						
	Upper KS2 Working Scientifically			Year 5			
•	planning different types of scientific enquiries to answer questions, including recognising and		Biology		Chemistry		Physics
•	controlling variables where necessary taking measurements, using a range of scientific equipment, with increasing accuracy and	Animals, including Human	All Living things a	and their habitats	Properties and Changes in Materials	Forces	Earth in Space
	precision, taking repeat readings when appropriate	Year 6					
•	recording data and results of increasing complexity using scientific diagrams and labels,	Biology		Physics			
:	classification keys, tables, scatter graphs, bar and line graphs using test results to make predictions to set up further comparative and fair tests reporting and presenting findings from enquiries, including conclusions, causal relationships and explanations of and degree of trust in results, in oral and written forms such as displays and other presentations identifying scientific evidence that has been used to support or refute ideas or arguments.	Animals, including Humans: Circulatory System	All Living things and their habitats	Evolution and Inheritance	Electricity (Circuits)		Light

- asking simple questions and recognising that they can be answered in different ways
- observing closely, using simple equipment

- performing simple tests
 identifying and classifying
 using their observations and ideas to suggest answers to questions
- gathering and recording data to help in answering questions

Plants	Animals (inc Humans)	Everyday Materials	Seasonal Changes
identify and name a variety of common wild and garden plants, including deciduous and evergreen trees identify and describe the basic structure of a variety of common flowering plants, including trees	identify and name a variety of common animals including fish, amphibians, reptiles, birds and mammals identify and name a variety of common animals that are carnivores, herbivores and omnivores describe and compare the structure of a variety of common animals (fish, amphibians, reptiles, birds and mammals including pets) identify, name, draw and label the basic parts of the human body and say which part of the body is associated with each sense	distinguish between an object and the material from which it is made identify and name a variety of everyday materials, including wood, plastic, glass, metal, water, and rock describe the simple physical properties of a variety of everyday materials compare and group together a variety of everyday materials on the basis of their simple physical properties	observe changes across the 4 seasons observe and describe weather associated with the seasons and how day length varies

Working Scientifically

- asking simple questions and recognising that they can be answered in different ways
- observing closely, using simple equipment
- performing simple tests
- identifying and classifying
 using their observations and ideas to suggest answers to questions
 gathering and recording data to help in answering questions

Plants	Animals (inc Humans)	Uses of Everyday Materials	Living things and their habitats
observe and describe how seeds and bulbs grow into mature plants find out and describe how plants need water, light and a suitable temperature to grow and stay healthy	notice that animals, including humans, have offspring which grow into adults find out about and describe the basic needs of animals, including humans, for survival (water, food and air) describe the importance for humans of exercise, eating the right amounts of different types of food, and hygiene	identify and compare the suitability of a variety of everyday materials, including wood, metal, plastic, glass, brick, rock, paper and cardboard for particular uses find out how the shapes of solid objects made from some materials can be changed by squashing, bending, twisting and stretching	explore and compare the differences between things that are living, dead, and things that have never been alive identify that most living things live in habitats to which they are suited and describe how different habitats provide for the basic needs of different kinds of animals and plants, and how they depend on each other identify and name a variety of plants and animals in their habitats, including microhabitats describe how animals obtain their food from plants and other animals, using the idea of a simple food chain, and identify and name different sources of food

Year 3

- asking relevant questions and using different types of scientific enquiries to answer them
- setting up simple practical enquiries, comparative and fair tests
- making systematic and careful observations and, where appropriate, taking accurate measurements using standard units, using a range of equipment, including thermometers and data loggers
- gathering, recording, classifying and presenting data in a variety of ways to help in answering questions
- recording findings using simple scientific language, drawings, labelled diagrams, keys, bar charts, and tables
- reporting on findings from enquiries, including oral and written explanations, displays or presentations of results and conclusions
- using results to draw simple conclusions, make predictions for new values, suggest improvements and raise further questions
- identifying differences, similarities or changes related to simple scientific ideas and processes
- using straightforward scientific evidence to answer questions or to support their findings

Plants	Animals (inc Humans)	Rocks	Light	Forces and magnets
identify and describe the functions of different parts of flowering plants: roots, stem/trunk, leaves and flowers explore the requirements of plants for life and growth (air, light, water, nutrients from soil, and room to grow) and how they vary from plant to plant investigate the way in which water is transported within	identify that animals, including humans, need the right types and amount of nutrition, and that they cannot make their own food; they get nutrition from what they eat identify that humans and some other animals have skeletons and muscles for support, protection and movement	compare and group together different kinds of rocks on the basis of their appearance and simple physical properties describe in simple terms how fossils are formed when things that have lived are trapped within rock recognise that soils are made from rocks and organic matter	recognise that they need light in order to see things and that dark is the absence of light notice that light is reflected from surfaces recognise that light from the sun can be dangerous and that there are ways to protect their eyes	compare how things move on different surfaces notice that some forces need contact between 2 objects, but magnetic forces can act at a distance observe how magnets attract or repel each other and attract some materials and not others
explore the part that flowers play in the life cycle of flowering plants, including pollination, seed formation and seed dispersal			recognise that shadows are formed when the light from a light source is blocked by an opaque object find patterns in the way that the size of shadows change	compare and group together a variety of everyday materials on the basis of whether they are attracted to a magnet, and identify some magnetic materials describe magnets as having 2 poles predict whether 2 magnets will attract or repel each other,

		depending on which poles are facing

- asking relevant questions and using different types of scientific enquiries to answer them
- setting up simple practical enquiries, comparative and fair tests
- making systematic and careful observations and, where appropriate, taking accurate measurements using standard units, using a range of equipment, including thermometers and data loggers
- gathering, recording, classifying and presenting data in a variety of ways to help in answering questions
- recording findings using simple scientific language, drawings, labelled diagrams, keys, bar charts, and tables
- reporting on findings from enquiries, including oral and written explanations, displays or presentations of results and conclusions
- using results to draw simple conclusions, make predictions for new values, suggest improvements and raise further questions
- identifying differences, similarities or changes related to simple scientific ideas and processes
- using straightforward scientific evidence to answer questions or to support their findings

Living things and their habitats	Animals (inc Humans)	States of matter	Sound	Electricity
recognise that living things can be grouped in a variety of ways	· ·	compare and group materials together, according to whether they are solids, liquids or gases	identify how sounds are made, associating some of them with something vibrating	identify common appliances that run on electricity
explore and use classification keys to help group, identify and name a variety of living things in their local and wider	identify the different types of teeth in humans and their	observe that some materials change state when they are heated or cooled, and measure	recognise that vibrations from sounds travel through a	construct a simple series electrical circuit, identifying and naming its basic parts, including cells, wires, bulbs,

environment	simple functions	or research the temperature at which this happens in degrees Celsius (°C)	medium to the ear	switches and buzzers
recognise that environments can change and that this can sometimes pose dangers to living things	construct and interpret a variety of food chains, identifying producers, predators and prey	identify the part played by evaporation and condensation in the water cycle and associate the rate of evaporation with temperature	find patterns between the pitch of a sound and features of the object that produced it find patterns between the volume of a sound and the strength of the vibrations that produced it recognise that sounds get fainter as the distance from the sound source increases	identify whether or not a lamp will light in a simple series circuit, based on whether or not the lamp is part of a complete loop with a battery recognise that a switch opens and closes a circuit and associate this with whether or not a lamp lights in a simple series circuit recognise some common conductors and insulators, and associate metals with being good conductors

- planning different types of scientific enquiries to answer questions, including recognising and controlling variables where necessary
- taking measurements, using a range of scientific equipment, with increasing accuracy and precision, taking repeat readings when appropriate
- recording data and results of increasing complexity using scientific diagrams and labels, classification keys, tables, scatter graphs, bar and line graphs
- using test results to make predictions to set up further comparative and fair tests
- reporting and presenting findings from enquiries, including conclusions, causal relationships and explanations of and a degree of trust in results, in oral and written forms such as displays and other presentations

• identifying scientific evidence that has been used to support or refute ideas or arguments

Living things and their habitats	Animals (inc Humans)	Properties and changes of materials	Earth and Space	Forces
describe the differences in the life cycles of a mammal, an amphibian, an insect and a bird describe the life process of reproduction in some plants and animals	describe the changes as humans develop to old age	compare and group together everyday materials on the basis of their properties, including their hardness, solubility, transparency, conductivity (electrical and thermal), and response to magnets know that some materials will dissolve in liquid to form a solution, and describe how to recover a substance from a solution use knowledge of solids, liquids and gases to decide how mixtures might be separated, including through filtering, sieving and evaporating give reasons, based on evidence from comparative and fair tests, for the particular uses of everyday materials, including metals, wood and plastic demonstrate that dissolving, mixing and changes of state	describe the movement of the Earth and other planets relative to the sun in the solar system describe the movement of the moon relative to the Earth describe the sun, Earth and moon as approximately spherical bodies use the idea of the Earth's rotation to explain day and night and the apparent movement of the sun across the sky	explain that unsupported objects fall towards the Earth because of the force of gravity acting between the Earth and the falling object identify the effects of air resistance, water resistance and friction, that act between moving surfaces recognise that some mechanisms including levers, pulleys and gears allow a smaller force to have a greater effect

	are reversible changes	
	explain that some changes result in the formation of new materials, and that this kind of change is not usually reversible, including changes associated with burning and the action of acid on bicarbonate of soda	

<u>Year 6</u>					
	Working Scientifically				
 planning different types of scientific enquiries to answer questions, including recognising and controlling variables where necessary taking measurements, using a range of scientific equipment, with increasing accuracy and precision, taking repeat readings when appropriate recording data and results of increasing complexity using scientific diagrams and labels, classification keys, tables, scatter graphs, bar and line graphs using test results to make predictions to set up further comparative and fair tests reporting and presenting findings from enquiries, including conclusions, causal relationships and explanations of and a degree of trust in results, in oral and written forms such as displays and other presentations identifying scientific evidence that has been used to support or refute ideas or arguments 					
Living things and their habitats	Animals (inc Humans)	Evolution and inheritance	Light	Electricity	

	describe how living things are classified into broad groups according to common observable characteristics and based on similarities and differences, including microorganisms, plants and animals give reasons for classifying plants and animals based on specific characteristics	identify and name the main parts of the human circulatory system, and describe the functions of the heart, blood vessels and blood recognise the impact of diet, exercise, drugs and lifestyle on the way their bodies function describe the ways in which nutrients and water are transported within animals, including humans	recognise that living things have changed over time and that fossils provide information about living things that inhabited the Earth millions of years ago recognise that living things produce offspring of the same kind, but normally offspring vary and are not identical to their parents identify how animals and plants are adapted to suit their environment in different ways and that adaptation may lead to evolution	recognise that light appears to travel in straight lines use the idea that light travels in straight lines to explain that objects are seen because they give out or reflect light into the eye explain that we see things because light travels from light sources to our eyes or from light sources to objects and then to our eyes use the idea that light travels in straight lines to explain why shadows have the same shape as the objects that cast them	compare and give reasons for variations in how components function, including the brightness of bulbs, the loudness of buzzers and the on/off position of switches use recognised symbols when representing a simple circuit in a diagram
--	---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

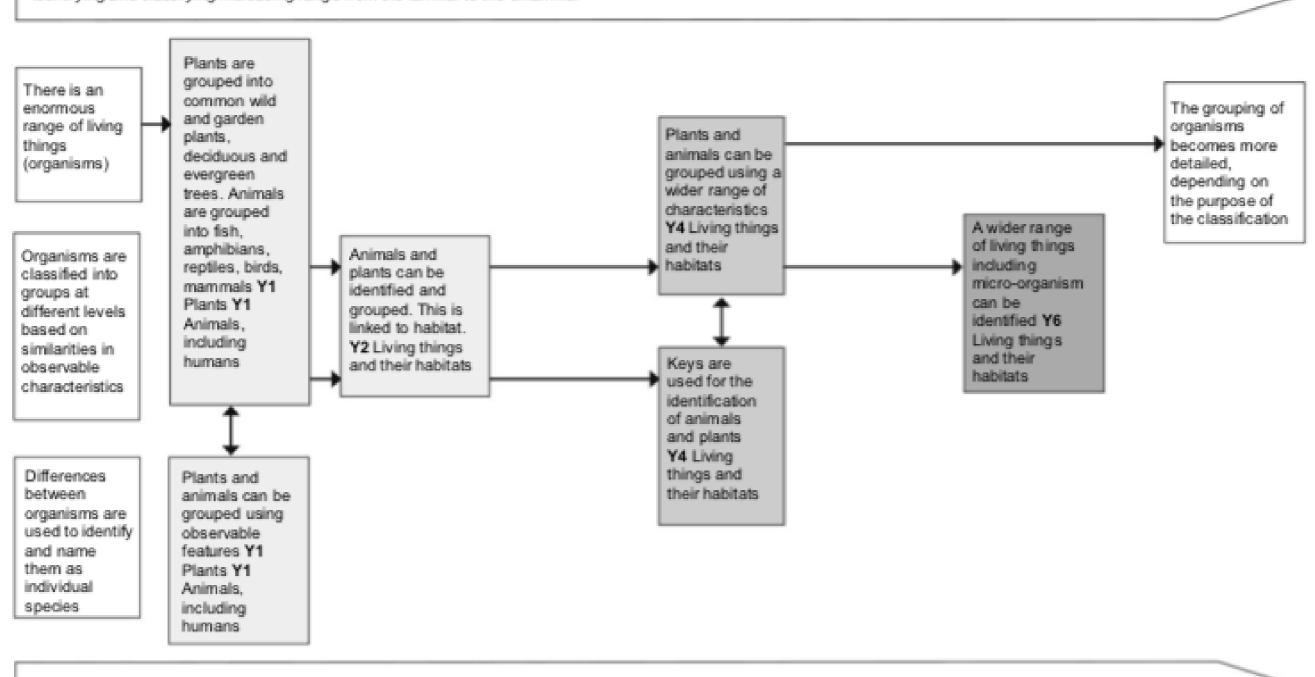

BIOLOGY: progression of ideas through KS1 and KS2

LIFE PROCESSES

CLASSIFICATION

Identifying and classifying increasing range from the familiar to the unfamiliar

Classifying into more specific groups by increasingly detailed characteristics

LIFE CYCLES Plants: seeds Plants can Plants make and bulbs grow reproduce seeds to into plants Y2 produce more asexually Y5 Living things Plants plants (sexual reproduction) and their Plants and Y3 Plants habitats animals Living things Animals, grow and produce induding change over offspring of humans, the course of Life cycles the same reproduce their lives differ for kind, but not offspring which different identical Y6 grow into adults Y2 Animals, species Y5 Evolution and Living things inheritance including Human and their humans development habitats has different stages between birth and death Y5 Animals, including humans INTERDEPENDENCE Plants and Adaptation | Living things animals are may lead to have changed over time Y6 adapted to evolution Y6 suit their Evolution and Evolution and environment inheritance inheritance Y6 Evolution Different plants and and animals live inheritan ce in different places to which they are suited-Environmental change by giving them and human impact food and shelter affects different Y2 Living things habitats differently Y6 and their habitats Living things and their All living things are dependent Animals get their food from Nutrients made by plants and plants move to primary other animals consumers and then to and in turn are secondary consumers consumed by

through food chains

humans

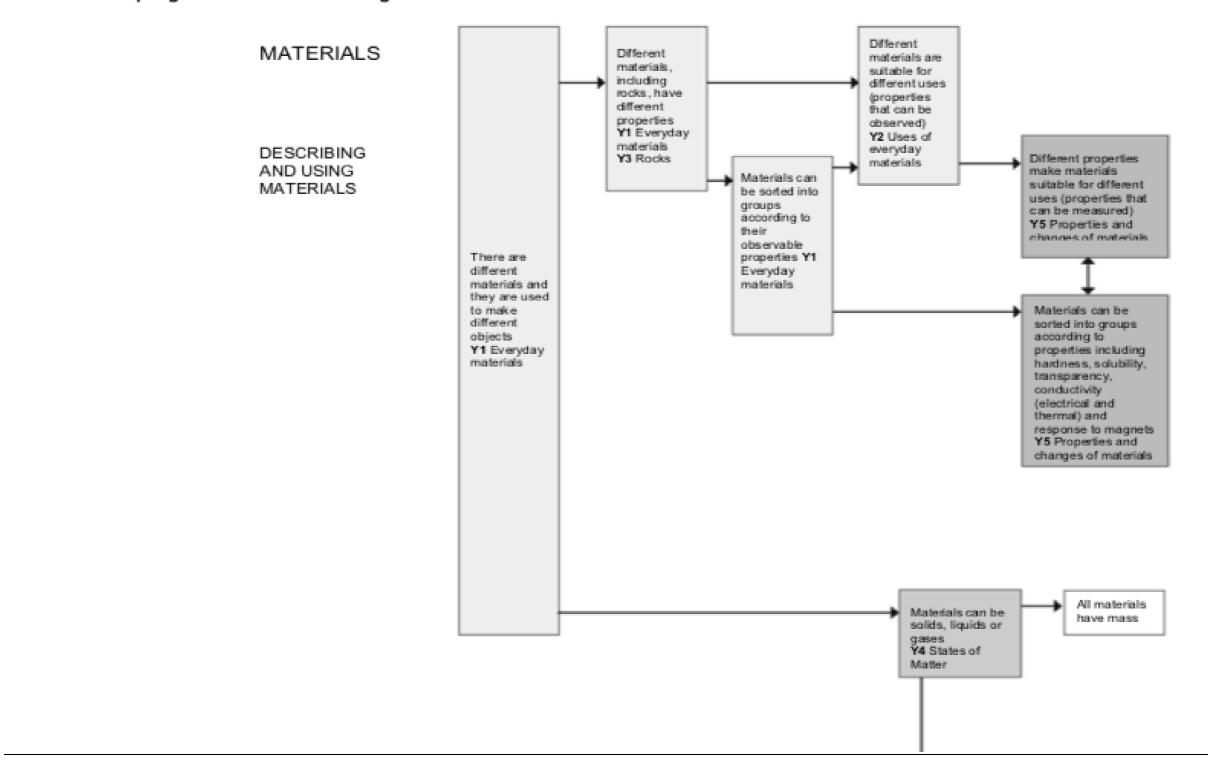

Y4 Animals, including

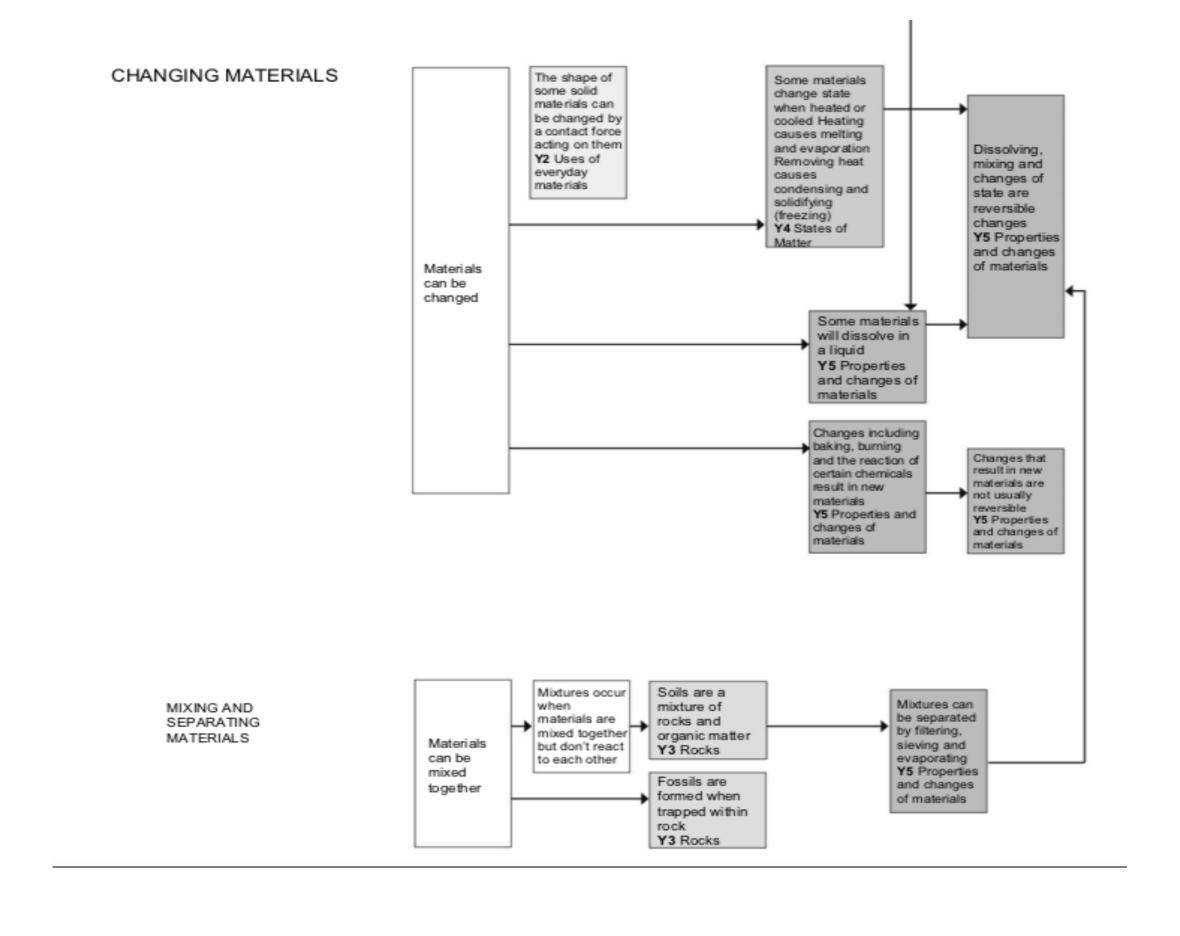

other animals

things and their habitats

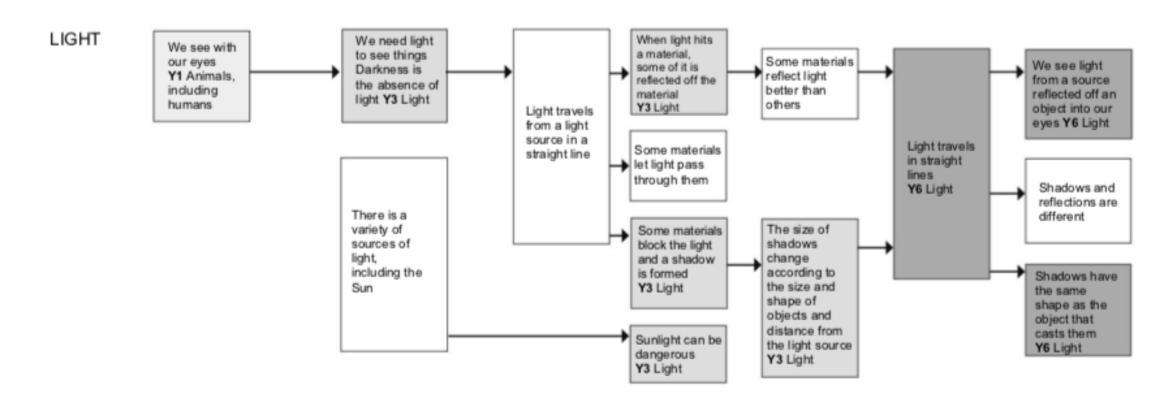

Y2 Living

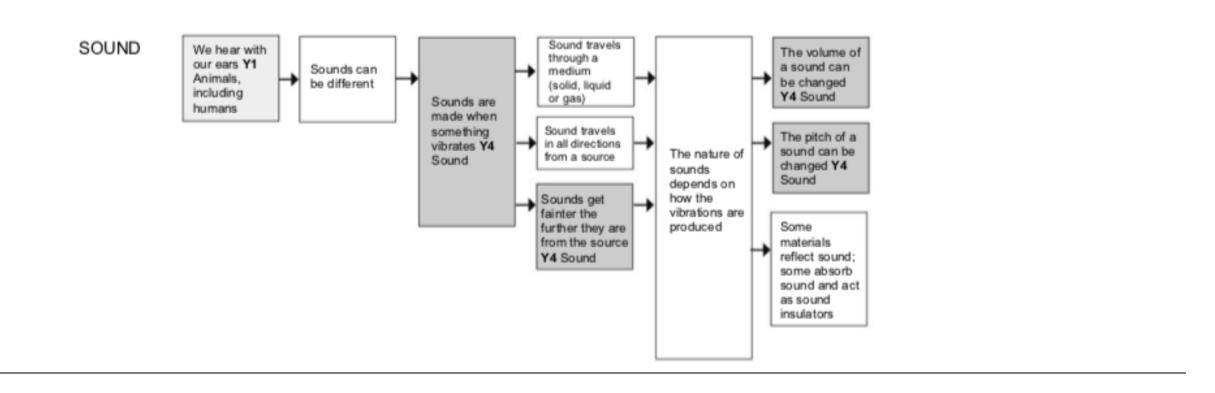

CHEMISTRY: progression of ideas through KS1 and KS2
