

FROM MR RARATY

We've had an amazing day!

Mike the BMX stuntman visited today.

And yes, that is four members of staff he is jumping over!

Mike uses the bikes to teach the mindset of 'I can do'. He worked with Year 6 to help improve the 'I can' attitude before they move onto secondary school.

Furthermore, for the first time in over a year, we were able to come together as a school, in our bubbles, outside, to enjoy 10 minutes of his stunts and skills. It was quite an emotional experience.

(As the BBC would say, this event was conducted under the current guidelines and all regulations were followed)

Have a lovely weekend!

Hello everyone,

We are really excited to introduce a new product called 'Accelerated Reader' at Rodings. It is a computer program that helps your child's teacher manage and monitor the children's independent reading practice. Your child picks a book at his/her own level and reads it at his/her own pace. When finished, your child takes a short quiz on the computer. (Passing the quiz is an indication that your child understood what was read.) Accelerated Reader gives both children and teachers feedback based on the quiz results, which your child's teacher can then use to help your child set targets and direct ongoing reading practice.

You may have noticed that your child has come home with a reading book with a sticker on the spine with 2 numbers. The number in black indicates the level of the book (each child has been given a reading range to help them select a book at an appropriate level for them) and the number in red indicates the number of points they can gain for reading that book.

We're really excited about introducing Accelerated Reader as we feel it will give us a much better understanding of your child as a reader whilst also supporting them in choosing a book that is the right level for them. We've been having a think about some possible prizes for points collected and have a few exciting things up our sleeves!

How can I help my child become a better reader?

As with anything, performance improves with practice. Encourage your child to read at home. Create a culture of reading in your household by reading with your child, starting a home library, visiting your local library or bookshop on a regular basis, letting your child see you reading and discussing books that each of you have read. When reading with your child, stop and ask questions to be sure your child is comprehending what is read. Reading with your child, no matter what the child's age, is an important part of developing a good reader, building a lifelong love of reading and learning and creating a loving relationship between you and your child. Make learning a family affair!

What if my child does not like reading?

Using Accelerated Reader, your child will choose the books he/she wants to read. The teacher will make certain the book is at the right level so that after completing the book, your child should do well on the Accelerated Reader Reading Practice Quiz. Success on the quiz will encourage your child to read more. With guidance from the teacher and success, even students who say they do not like reading will develop a love of reading.

I am concerned that my child will be unfairly compared to others.

Then you will really like Accelerated Reader because it helps the teacher work with each child individually. Students using Accelerated Reader are encouraged to progress at their own pace and set their own targets with the help of the teacher. The aim of Accelerated Reader is for all children to succeed in achieving their targets.

How does the school determine my child's reading level?

Teachers determine your child's reading level through a Star Reading Quiz. Star Reading is a computerised reading assessment that uses computer-adaptive technology. Questions continually adjust to your child's responses. If the child's response to a question is correct, the difficulty level of the next question is increased. If the child misses a question, the difficulty level of the next question is reduced. The test uses multiple-choice questions and takes approximately 20 minutes.
